

Problem

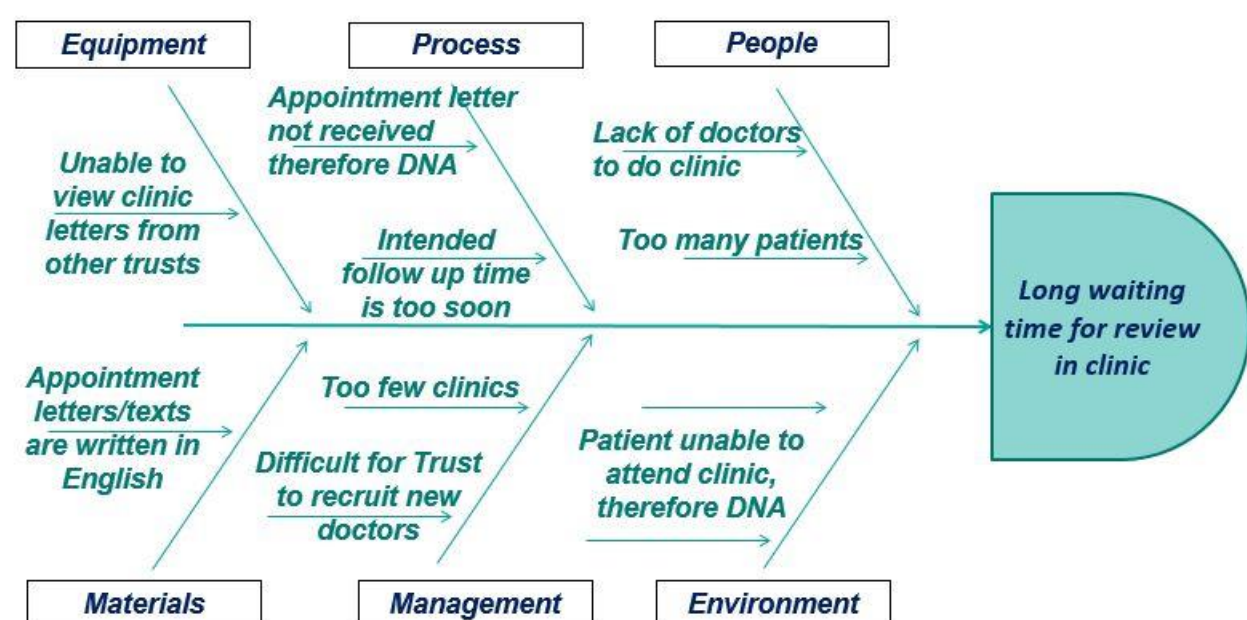

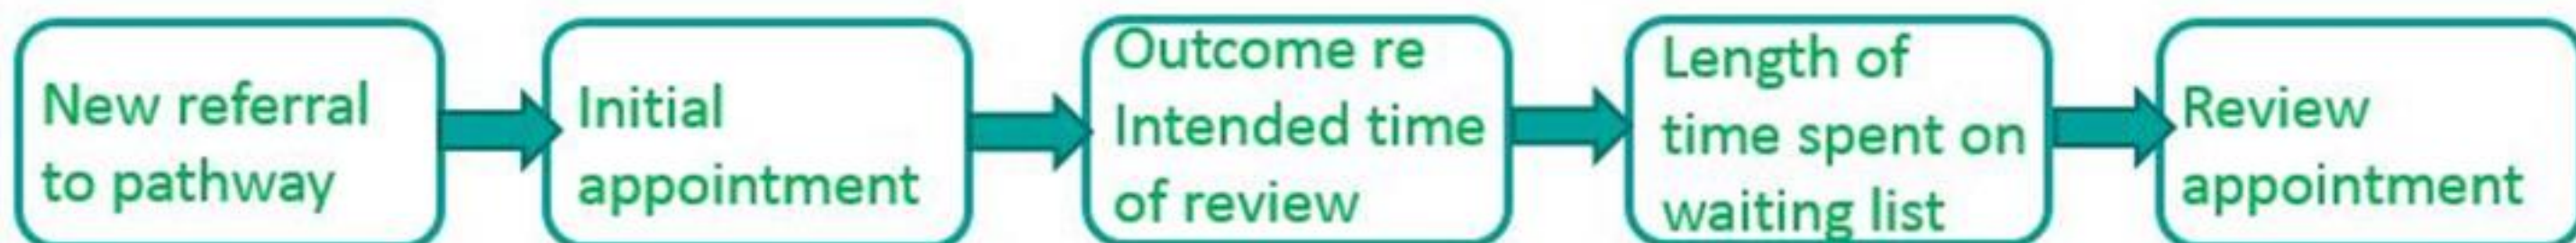

Some children wait a lot longer than intended for their follow up in the Motor Disorder Clinic

Aim

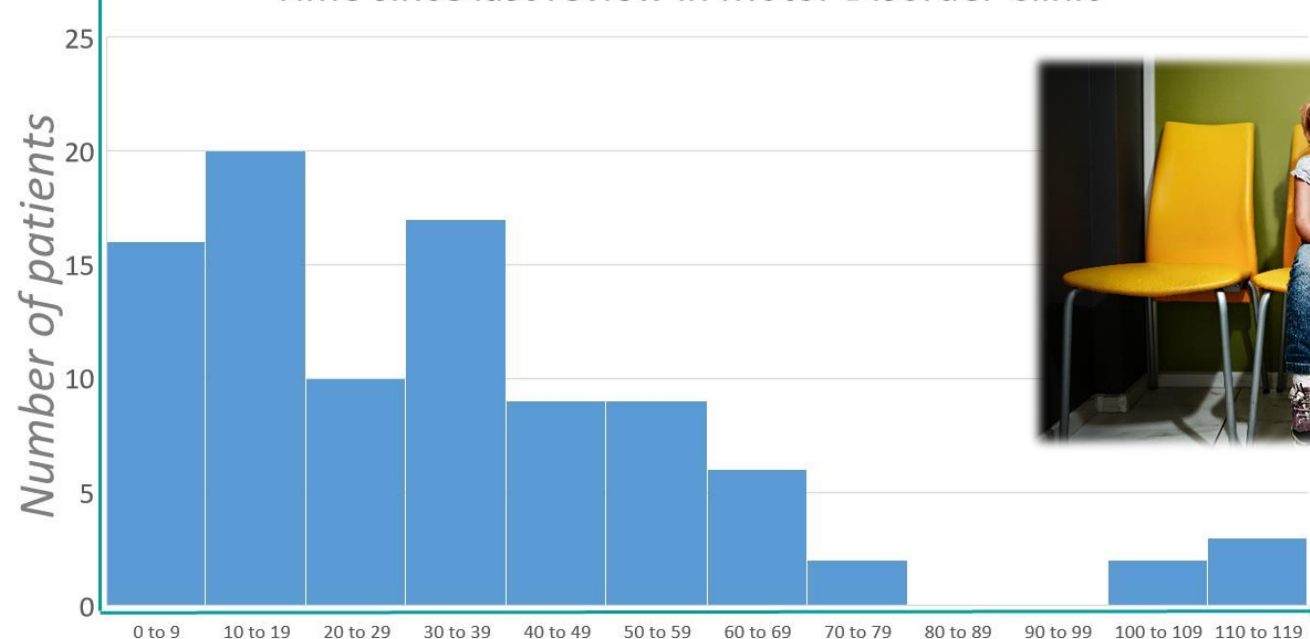

All children on the motor disorder waiting list to be reviewed every year by December 2020

Covid-19 restrictions

In March 2020, face to face clinics were replaced by telephone consultations

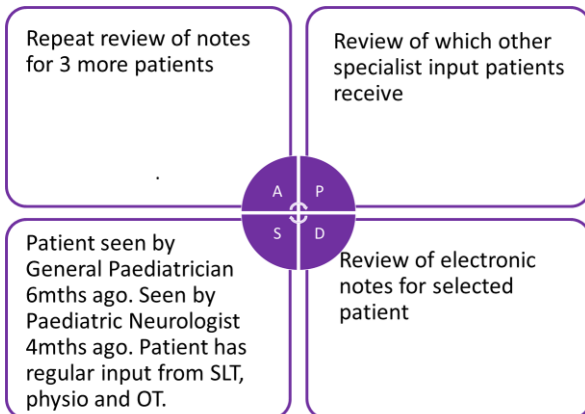

Time since last review in Motor Disorder Clinic

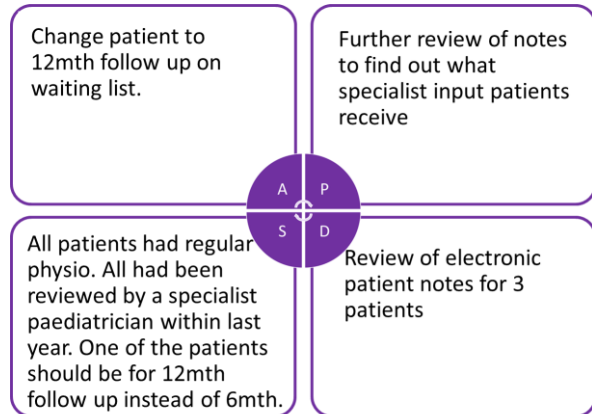

Time since review (weeks)

2.1

2.2

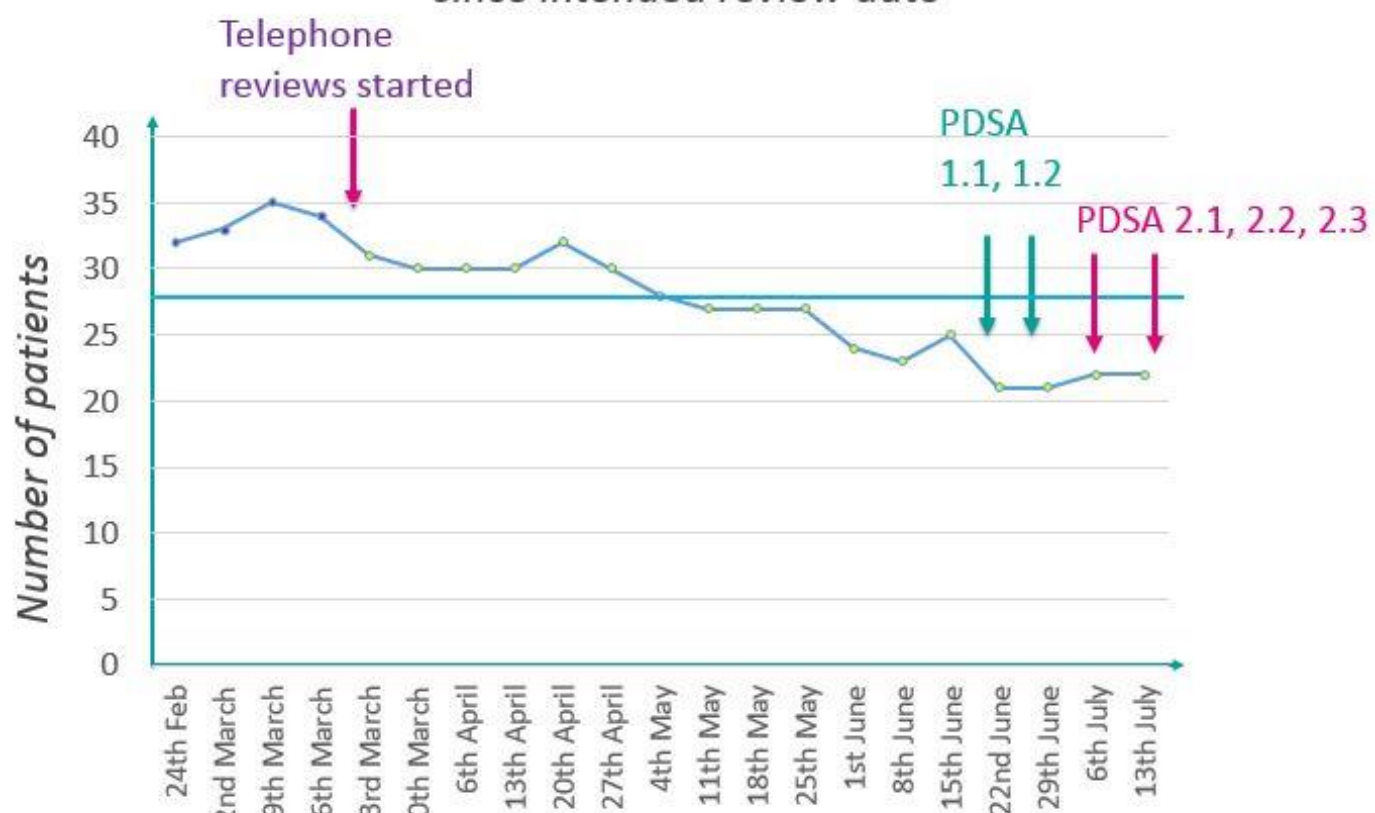

2.3

Number of patients reviewed per week

Number of patients exceeding 12weeks or longer, since intended review date

Covid-19 has given the opportunity to try new ways of engaging with patients. Telephone consultations have allowed us to review some patients who had been waiting for a long time. Patients with complex motor disorder often have input from multiple specialists & therapists. Telephone reviews may be helpful in reaching patients who are otherwise difficult to reach.
